

Speaker 1: Vaccinations are underway at some of our local nursing homes and these are some photos from the first ever vaccine clinic held yesterday at Marshall Pines Assisted Living in Evans.

Speaker 1: We're told about 30 seniors living there and with the help of CVS, around 90% of residents and staff were able to get the first dose of the Pfizer vaccine. Staff there tells us their community is one of the few did remain COVID-free during the pandemic and they hope the vaccine makes the residents feel even more protected.

Martie Ewest: For us to be able to offer [00:00:30] this to our residents and staff members has been monumental. It's just another level of protection that we have, to protect everybody against the COVID virus.

Speaker 1: Marshall Pine says it's also protecting its residents by having an ionization system in the building and common areas to help filter the air. Their seniors are set to get the second dose of the Pfizer vaccine on February 5th.
